

Quiz – English version

<https://energies2050.org/the-heat-you-know-quiz/?lang=en>

WELCOME TO THE QUIZ THE HEAT YOU KNOW!

BECOME, AS ME, A HEAT JEDI!

Did you know that energy efficient heating technologies can help to tackle climate targets by reducing CO₂ emissions? Most of the currently installed stock of heating appliances in European countries are old and inefficient.

Replacing them with new, more energy efficient and/or renewable heating solutions, will help to reduce the greenhouse gas emissions and, thus, the environmental impact.

In addition to this general co-benefit, we can also achieve energy and money savings! Maybe you already knew about that?

‘The heat you know’ will test your knowledge, and each question will teach you more about efficient heating.

What can I learn?

Interesting information about efficient heating, from general definitions to technical information.

Here are some keywords:

- Energy efficiency
- Renewable energy
- Fossil fuels
- Energy labels
- Rebound effect
- Smart heating and energy saving behaviours
- 2050+resilient scenarios
